## AMENDMENTS TO THE CLAIMS

Claims 1-7 (Cancelled)

8. (Currently Amended) A method for receiving publications and forwarding said publications on to parties who have subscribed to receive such publications, said method comprising:

receiving a subscription request of a first type, said request including a filter expression having at least one attribute;

mapping at least part of [[an]] the at least one attribute to a generic format (generic format filter attribute);

receiving a publication message of a second type;

comparing the publication <u>message</u> received <del>with to</del> the subscription request to determine whether the publication <u>message</u> is appropriate for forwarding onto [[the]] <u>a</u> subscriber originating the request, the step of comparing comprising:

identifying a generic format filter attribute; and

mapping the generic format filter attribute to a format corresponding to the second message type, the method further comprising:

transmitting said publication  $\underline{message}$  to the originating subscriber.

 (Currently Amended) The method of claim 8, further comprising: preparing the publication <u>message</u> for transmission to said originating subscriber. Application No.: 10/017,728

10. (Currently Amended) The method of claim 9, wherein the step of preparing the

 $publication \ \underline{message} \ for \ transmission \ to \ said \ originating \ subscriber \ comprises:$ 

creating a substantially empty message of said first type;

extracting information from the publication message of said second type; and

inputting said information into said substantially empty message.

11. (Original) The method of claim 8, 9 or 10, wherein the step of mapping at least part

of an attribute to a generic format comprises:

invoking a first component capable of understanding messages of said first type.

12. (Previously Presented) The method of claim 8, 9 or 10, comprising:

storing said generic format filter attribute.

13. (Previously Presented) The method of any of claims 8, 9 or 10, wherein the step of

mapping a generic format filter attribute to a format corresponding to the second message type

comprises:

invoking a second component capable of understanding messages of said second type.

14. (Previously Presented) The method of any of claims 8, 9 or 10, wherein said format

corresponding to the second message type is held in temporary storage until said comparison is

complete.

Claim 15 (Cancelled)
